

# ADDITIVATO

The logo for Eiffel, featuring the word "EIFFEL" in white, bold, uppercase letters on a red rectangular background.

The **Additivato** mulch film is transparent and allows for excellent light transmission. This ensures good soil and plant root system warming, ensuring a better water balance for the soil to retain its moisture. It is suitable for winter crops in cold areas and to anticipate harvesting of early crops.

Its UV stabilization avoids premature aging and degradation at the end of harvest, making it suitable for cultivation and mechanized harvesting any time of the year.

*Standard in stock:*
